*Electroencephalography and clinical Neurophysiology*, 1989, 72: 555–567
Elsevier Scientific Publishers Ireland, Ltd.

# Index of Authors

## VOLUME 72, 1989

(The numbers followed by P refer to abstracts from Society Proceedings)

Abbruzzese, M., 82P
Abraham, R., 63P
Accornero, N., Berardelli, A. and Manfredi, M., A composite probe for acoustic and electromyographic recording of muscular activity, 548
Ackell, A.B., 1P
Acosta, J., 90P
Adams, G., 40P
Adams, J., 63P
Aiello, I., 83P
Albrecht, V., 70P
Alcântara, J., 88P
Alfonsi, E., 81P
Aljarrat, I., 48P
Allard, F., see Nativ, A., 157
Allen, B., 33P, 100P
Almenar, C., 88P
Alvarez, N., see Neill, J.C., 198
Ambiveri, G., 76P
Ambler, Z., 72P, 73P
Amblerová, V., 73P
Ambrosetto, G., 84P
Aminoff, M.J., 97P
Amos, P., see Wroe, S.J., 346
Andersen, S.K., 52P
Anderson, C., 100P
Andreassen, S., 52P
Andrews, J.M., 19P
Anelli, S., 76P
Angeleri, F., 78P
Apih, G., 84P
Apollo, F., 85P
Arcelloni, T., 76P
Arimura, K., 96P
Arimura, Y., 96P
Arne, P., 90P
Arrigo, A., 81P
Artru, F., 89P
Asencor, J., 45P
Austin, C., 21P
Autret, A., 36P, 88P
Autret, E., 88P
Averbook, A., 9P
Averbook, A., see Epstein, C.M., 133
Awad, I.A., 3P, 7P, 11P

# Index of Subjects

## VOLUME 72, 1989

(Abstracts from Society Proceedings are not included)

Acoustic myography, a probe for, 548
Action potentials
- APs elicited by air-puff stimulation, 321
- from APs to far-field potentials, 439
- magnetic compound action potentials, 277
Aging
- brain potentials in a memory-scanning task, 507
- EEG in pseudodementia and dementia with depression, 298
- effects on delta and REM sleep parameters, 118
- P300 latency variability in normal elderly, 384
- topographic EEG changes with normal aging and SDAT, 281
Alpha rhythm
- computed radial-current topography of the brain, 41
- computer simulation of the EEG, 31
Alzheimer's disease
- EEG spectral analysis in early stage, 290
- topographic EEG changes, 281
Ambulatory monitoring
- automated analysis of EEGs, 165
- heart rate changes during partial seizures, 207
- inter-reviewer reliability of attack, 346
Amplitopic organization of the human auditory cortex, 225
Amygdala
- heart rate, respiration and epileptic discharges, 463
Anesthesia effects: BAEPs, 422
Antiepileptic drugs, spiking and seizures, 7
Artefact elimination
- origin of the initial lambda wave component, 114
- practical digital EMG filters, 268
Auditory brain-stem potentials
- anesthesia effects, 422
- binaural interactions in guinea pig, 535
Auditory cortex, amplitopic organization, 225
Auditory stimulation
- lability of brain-stem microreflexes, 48
- rhythmic auditory stimulation in epilepsy, 455
Automated analysis of ambulatory EEGs, 165

BAEPs, *see* Auditory brain-stem potentials
Behavior, every-day environment and epileptic events, 198
Benzodiazepines, quantification of EEG, 126
Bilateral EMG analysis of the lower limb, 429
Binaural interactions in BAEPs from guinea pig, 535
Blink reflex
- origin of the initial lambda wave component, 114
Blood pressure
- lock-step phenomenon and cardiovascular function, 340
Book reviews, 91, 367, 459, 550
Brachial plexus, conduction block, 259
Brain-stem
- lability of brain-stem microreflexes, 48
- *see also* Auditory brain-stem potentials

Cardiac, *see* Heart rate
Cardiac nerve and lock-step phenomenon, 340
Cardiovascular surgery and cerebral protection, 81
Cerebral blood flow
- and $O_2$ metabolism, EEG correlates, 16
- EEG and PET in cerebral infarction, 16
Cerebral cortex
- activation during planning of voluntary movement, 250
- and GABA in photosensitive baboons, 147
- projections from the human foot, 518
Cerebral protection during cardiovascular surgery, 81
Circadian cycles, polysomnography in sleeping sickness, 471
Cognition and GABA in photosensitive baboons, 147
Computed EEG topography, *see* Topography
Computed tomography
- locations of occipital EEG electrodes by CT, 362
Computer
- quantification of benzodiazepine EEG, 126
- radial-current topography of the brain, 41
- simulation of the EEG, 31
Conduction
- APs elicited by air-puff stimulation, 321
- conduction block of the brachial plexus, 259
- muscle conduction velocity and stimulation rate, 529
Current dipole, subdural electrode dipole for MEG, 86
Current source, *see* Generators
Cutaneous afferents from the human foot to cortex, 518

0013-4649/89/$03.50 © 1989 Elsevier Scientific Publishers Ireland, Ltd.

DC recording
– high-quality scalp DC recordings, 545
– slow waves in tracking task, 232
Dementia
– EEG in pseudodementia and dementia with depression, 298
– EEG spectral analysis in early stage Alzheimer, 290
– P300 latency variability in normal elderly, 384
– topographic EEG changes, 281
Depression, EEG in pseudodementia and dementia, 298
Depth electrode monitoring
– heart rate, respiration and epileptic discharges, 463
Diagnosis, benign epileptiform transients of sleep, 479
Diaphragm EMG in man, 59
Digital EMG filters, 268
Diurnal rhythms in primate spinal reflexes and SEPs, 69

EEG
– and PET in cerebral infarction, 16
– attacks in ambulatory EEG, 346
– automated analysis of ambulatory EEGs, 165
– cerebral protection during cardiovascular surgery, 81
– computed radial-current topography of the brain, 41
– computer simulation of the EEG, 31
– correlates of cerebral blood flow and $O_2$ metabolism, 16
– cross-correlation after sleep deprivation, 305
– EEG changes with normal aging and SDAT, 281
– EEG development in Rett syndrome, 1
– EEG mean frequencies and phenylalanine, 133
– EEG power density and sleep deprivation, 312
– every-day environment and epileptic events, 198
– high-quality scalp DC recordings, 545
– in pseudodementia and dementia with depression, 298
– inter-reviewer reliability and ambulatory EEG, 346
– in very low-birthweight infants, 189
– locations of occipital EEG electrodes by CT, 362
– mapping with spherical splines, 184
– origin of the lambda wave in man, 95
– practical digital EMG filters, 268
– prolonged inactive phases in VLBW infants, 189
– quantification of benzodiazepine EEG, 126
– spectral analysis in early stage Alzheimer, 290
– spiking, seizures and medication, 7
Elderly, *see* Aging
Electrocardiogram during partial seizures, 207
Electrode for acoustic myography, 548
Electrode placement
– craniocerebral topography within the 10–20 system, 499
– electrode spacing for topographic mapping, 355
– locations of occipital EEG electrodes by CT, 362
– subdural electrode dipole for MEG, 86
EMG
– a probe for acoustic myography, 548
– bilateral EMG analysis of the lower limb, 429
– human diaphragm EMG, 59
– practical digital EMG filters, 268
– 24 h tremor quantification based on EMG recording, 176
Encephalopathy, *see* Neurological disorders

Epilepsy
– benign epileptiform transients of sleep, 479
– cat penicillin focus and midline spikes, 140
– EEG development in Rett syndrome, 1
– every-day environment and epileptic events, 198
– GABA and cerebral cortex in photosensitive baboons, 147
– heart rate changes during partial seizures, 207
– heart rate, respiration and epileptic discharges, 463
– inter-reviewer reliability and ambulatory EEG, 346
– lock-step phenomenon and cardiovascular function, 340
– midline spikes in human epilepsy, 140
– practical digital EMG filters, 268
– rhythmic auditory stimulation in epilepsy, 455
– spiking, seizures and medication, 7
Event-related activity
– and recognition memory for words, 395
– in a memory-scanning task, 407, 507
– late sequelae of a neonatal neurological condition, 491
– planning of voluntary movement, 250
Evoked potentials
– brain potentials in a memory-scanning task, 407, 507
– cortical projections from the human foot, 518
– diurnal rhythms in primate spinal reflexes and SEPs, 69
– electrode spacing for topographic mapping, 355
– mapping with spherical splines, 184
– P300 latency variability in normal elderly, 384
– topographical and temporal stability of P300, 373
– *see also* Auditory brain-stem potentials
Excitability, handedness and reflex excitability, 157
Eye movement
– origin of the initial lambda wave component, 114
– origin of the lambda wave in man, 95

Far-field potentials, from action potentials to, 439
Focal epilepsy and midline spikes, 140

GABA and cerebral cortex in photosensitive baboons, 147
Gait, bilateral EMG analysis of the lower limb, 429
Generators
– amplitopic organization of the human auditory cortex, 225
– computed radial-current topography of the brain, 41
– computer simulation of the EEG, 31
– from action potentials to far-field potentials, 439
– mapping with spherical splines, 184

Handedness and reflex excitability, 157
Heart rate
– changes during partial seizures, 207
– respiration and epileptic discharges, 463
Hemispheric correlation
– after sleep deprivation, 305
– handedness and reflex excitability, 157
Hippocampus
– heart rate, respiration and epileptic discharges, 463
Hoffmann reflex, handedness and reflex excitability, 157
Hypothermia
– cerebral protection during cardiovascular surgery, 81

Infants
- EEG in very low-birthweight infants, 189
- late sequelae of a neonatal neurological condition, 491
- positive bursts in childhood encephalopathies, 486
- prolonged inactive phases in the EEG of VLBW infants, 189
Infarction
- EEG and PET in cerebral infarction, 16
- EEG correlates of cerebral blood flow and $O_2$ metabolism, 16
Information processing
- late sequelae of a neonatal neurological condition, 491
Intensity coding
- amplitopic organization of the human auditory cortex, 225
Interictal activity, midline spikes, 140

Ketamine anesthesia effects: BAEPs, 422

Lambda waves
- origin of the initial lambda wave component, 114
- origin of the lambda wave in man, 95
Laplacian operator
- computed radial-current topography of the brain, 41
Lock-step phenomenon cardiovascular function, 340
Long-loop reflexes, handedness and reflex excitability, 157

Magnetic field
- amplitopic organization of the human auditory cortex, 225
- magnetic compound action potentials, 277
Magnetic resonance imaging and the 10–20 international system, 499
Magnetoencephalogram, subdural electrode dipole for MEG, 86
Mapping, *see* Topography
Mecanoreceptive units, APs elicited by air-puff stimulation, 321
Median nerve, magnetic compound action potentials, 277
Memory
- brain potentials in a memory-scanning task, 407, 507
- ERPs and recognition memory for words, 395
Mental retardation, *see* Retardation
Metabolism
- EEG and PET in cerebral infarction, 16
- EEG correlates of cerebral blood flow and $O_2$ metabolism, 16
Methodology, electrode spacing for topographic mapping, 355
Microelectrode intraoperative recording in human spinal cord, 450
Models
- computer simulation of the EEG, 31
- EEG power density and sleep deprivation, 312
- from action potentials to far-field potentials, 439
- mapping with spherical splines, 184
Monitoring
- automated analysis of ambulatory EEGs, 165
- every-day environment and epileptic events, 198
- heart rate changes during partial seizures, 207
- 24 h polysomnography in sleeping sickness, 471
Monkey
- GABA and cerebral cortex in photosensitive baboons, 147
Motor
- craniocerebral topography within the 10–20 system, 499
- evoked responses in L5 or S1 radiculopathy, 334
- planning of voluntary movement, 250
- *see also* Eye movement
Multiunit activity
- human thalamic and pallidal responses, 240
- intraoperative unit recording in human spinal cord, 450
Multiple sclerosis, origin of the lambda wave in man, 95
Mu rhythms and planning of voluntary movement, 250
Muscle
- a probe for acoustic myography, 548
- cortical projections from the human foot, 518
- muscle conduction velocity and stimulation rate, 529

Nap timing, 218
Neonatal neurological optimality, late sequelae, 491
Nerve
- action potentials elicited by air-puff stimulation, 321
- *see also* Conduction
Neurological disorders
- EEG development in Rett syndrome, 1
- EEG spectral analysis in early stage Alzheimer, 290
- lambda waves in multiple sclerosis, 95
- positive bursts in childhood encephalopathies, 486
- topographic EEG changes with SDAT, 281
- 24 h polysomnography in sleeping sickness, 471
Neuropathy
- conduction block of the brachial plexus, 259
- motor evoked responses in L5 or S1 radiculopathy, 334
Normal subjects
- bilateral EMG analysis of the lower limb, 429
- cortical activation and preparation to movement, 250
- lability of brain-stem microreflexes, 48
- P300 latency variability in normal elderly, 384
- topographic EEG changes with normal aging and SDAT, 281

Occipital cortex
- locations of occipital EEG electrodes by CT, 362
- origin of the lambda wave in man, 95

Pain, motor evoked responses in L5 or S1 radiculopathy, 334
Pallidal and thalamic responses in man, 240
Parkinsonism
- human thalamic and pallidal responses, 240
- 24 h tremor quantification based on EMG recording, 176
Penicillin focus and midline spikes, 140
Performance
- late sequelae of a neonatal neurological condition, 491
Phenylalanine and EEG mean frequencies, 133
Phenylketonuria
- EEG mean frequencies and phenylalanine, 133
Photic stimulation in epilepsy, 455
Photosensitive baboons, GABA and cerebral cortex, 147

Positive bursts in childhood encephalopathies, 486
Positron emission tomography
– cerebral blood flow and $O_2$ metabolism, 16
– in cerebral infarction, 16
Preparation to movement and cortical activation, 250
Primates
– diurnal rhythms in primate spinal reflexes and SEPs, 69
– GABA and cerebral cortex in photosensitive baboons, 147
Principal component analysis of benzodiazepine EEG, 126
Prognosis
– EEG in very low-birthweight infants, 189
– prolonged inactive phases in the EEG of VLBW infants, 189
P300
– latency variability in normal elderly, 384
– topographical and temporal stability of P300, 373

Quantification
– EEG correlates of cerebral blood flow and $O_2$ metabolism, 16
– of benzodiazepine EEG, 126
– 24 h tremor quantification based on EMG recording, 176

Radial-current topography of the brain, 41
Radiculopathy and motor evoked responses, 334
Reciprocal inhibition and handedness, 157
Recognition memory task and ERPs, 395
Reflexes
– diurnal rhythms in spinal reflexes and SEPs, 69
– handedness and reflex excitability, 157
– lability of brain-stem microreflexes, 48
Respiration
– and epileptic discharges, 463
– human diaphragm EMG, 59
Retardation, every-day environment and epileptic events, 198
Rhythmicity, computer simulation of the EEG, 31

Saccade, origin of the lambda wave in man, 95
Scalp potentials
– high-quality scalp DC recordings, 545
– mapping with spherical splines, 184
Sensory cortex topography within the 10–20 system, 499
Sensory stimulation, APs elicited by air-puff stimulation, 321
Simulation of the EEG with a computer, 31
Sleep
– age effects on delta and REM sleep parameters, 118
– benign epileptiform transients of sleep, 479
– cross-correlation after sleep deprivation, 305
– SWS deprivation, EEG power density and sleep duration, 312
– 24 h polysomnography in sleeping sickness, 471
Sleepiness, timing of naps, 218
Slow waves in tracking task, 232
Society proceedings
– AAEE/AEEGS Joint Symposium, San Diego, October, 1988, 93P
– American, San Diego, February 1988, 31P
– American, San Diego, October 1988, 1P
– Czechoslovak, Opava, May 1988, 66P
– Dutch, Utrecht, April 1988, 43P
– English, Leeds, April 1988, 40P
– English, Bristol, June 1988, 61P
– English, London, October 1988, 106P
– Finnish, Espoo, May 1988, 52P
– French, Rouen, March 1988, 36P
– French, Toulouse, June 1988, 87P
– German, Bad Hofgastein, January 1988, 24P
– Italian, Parma, October 1987, 76P
– Spanish, Barcelona, December 1987, 45P
Somatosensory evoked potentials
– diurnal rhythms in primate, 69
– electrode spacing for topographic mapping, 355
Spatial distribution, *see* Topography
Spectral EEG analysis
– age effects on delta and REM sleep parameters, 118
– and phenylalanine, 133
– and sleep deprivation, 312
– in early stage Alzheimer, 290
– of benzodiazepine EEG, 126
Spiking, seizures and medication, 7
Spinal cord
– diurnal rhythms in primate spinal reflexes and SEPs, 69
– handedness and reflex excitability, 157
– intra-operative unit recording in man, 450
– motor evoked responses in L5 or S1 radiculopathy, 334
Stationary potentials, from APs to far-field potentials, 439
Stimulation
– brain potentials in a memory-scanning task, 407, 507
– muscle conduction velocity and stimulation rate, 529
Subdural electrode dipole for MEG, 86
Supraspinal loop, handedness and reflex excitability, 157

Tasks
– brain potentials in a memory-scanning task, 407, 507
– ERPs and recognition memory for words, 395
– slow waves in tracking task, 232
Technique
– a probe for acoustic myography, 548
– automated analysis of ambulatory EEGs, 165
– high-quality scalp DC recordings, 545
– intra-operative unit recording in human spinal cord, 450
– practical digital EMG filters, 268
– 24 h tremor quantification based on EMG recording, 176
Telemetry, every-day environment and epileptic events, 198
Temporal lobe
– craniocerebral topography within the 10–20 system, 499
– heart rate, respiration and epileptic discharges, 463
Temporo-spatial stability of P300, 373
Thalamus
– computer simulation of the EEG, 31
– human thalamic and pallidal responses, 240
Topographic mapping
– computed radial-current topography of the brain, 41
– cortical activation and preparation to movement, 250
– EEG changes with normal aging and SDAT, 281

– electrode spacing for topographic mapping, 355
– mapping with spherical splines, 184
– planning of voluntary movement, 250
– quantification of benzodiazepine EEG, 126
– topographical and temporal stability of P300, 373
Tracking task and slow waves, 232
Tremor quantification based on 24 h EMG recording, 176

Ulnar nerve
– conduction block of the brachial plexus, 259
– magnetic compound action potentials, 277
Unitary activity
– heart rate, respiration and epileptic discharges, 463
– intra-operative unit recording in human spinal cord, 450

Vertex spikes in cat penicillin focus and human epilepsy, 140
Visual cortex topography within the 10–20 system, 499
Visual evoked potentials
– origin of the lambda wave in man, 95
Visual recognition task
– human thalamic and pallidal responses, 240
Voluntary contraction
– and cortical activation, 250
– muscle conduction velocity and stimulation rate, 529

Wakefulness, cross-correlation after sleep deprivation, 305
Walking, bilateral EMG analysis of the lower limb, 429
Wave form recognition in benzodiazepine EEG, 126
Withdrawal
– GABA and cerebral cortex in photosensitive baboons, 147
Words, ERPs and recognition memory for words, 395
